
PlaceMap

PlaceMap

Using the power of Google Earth to store and display all of your spatial data in a much more dynamic way

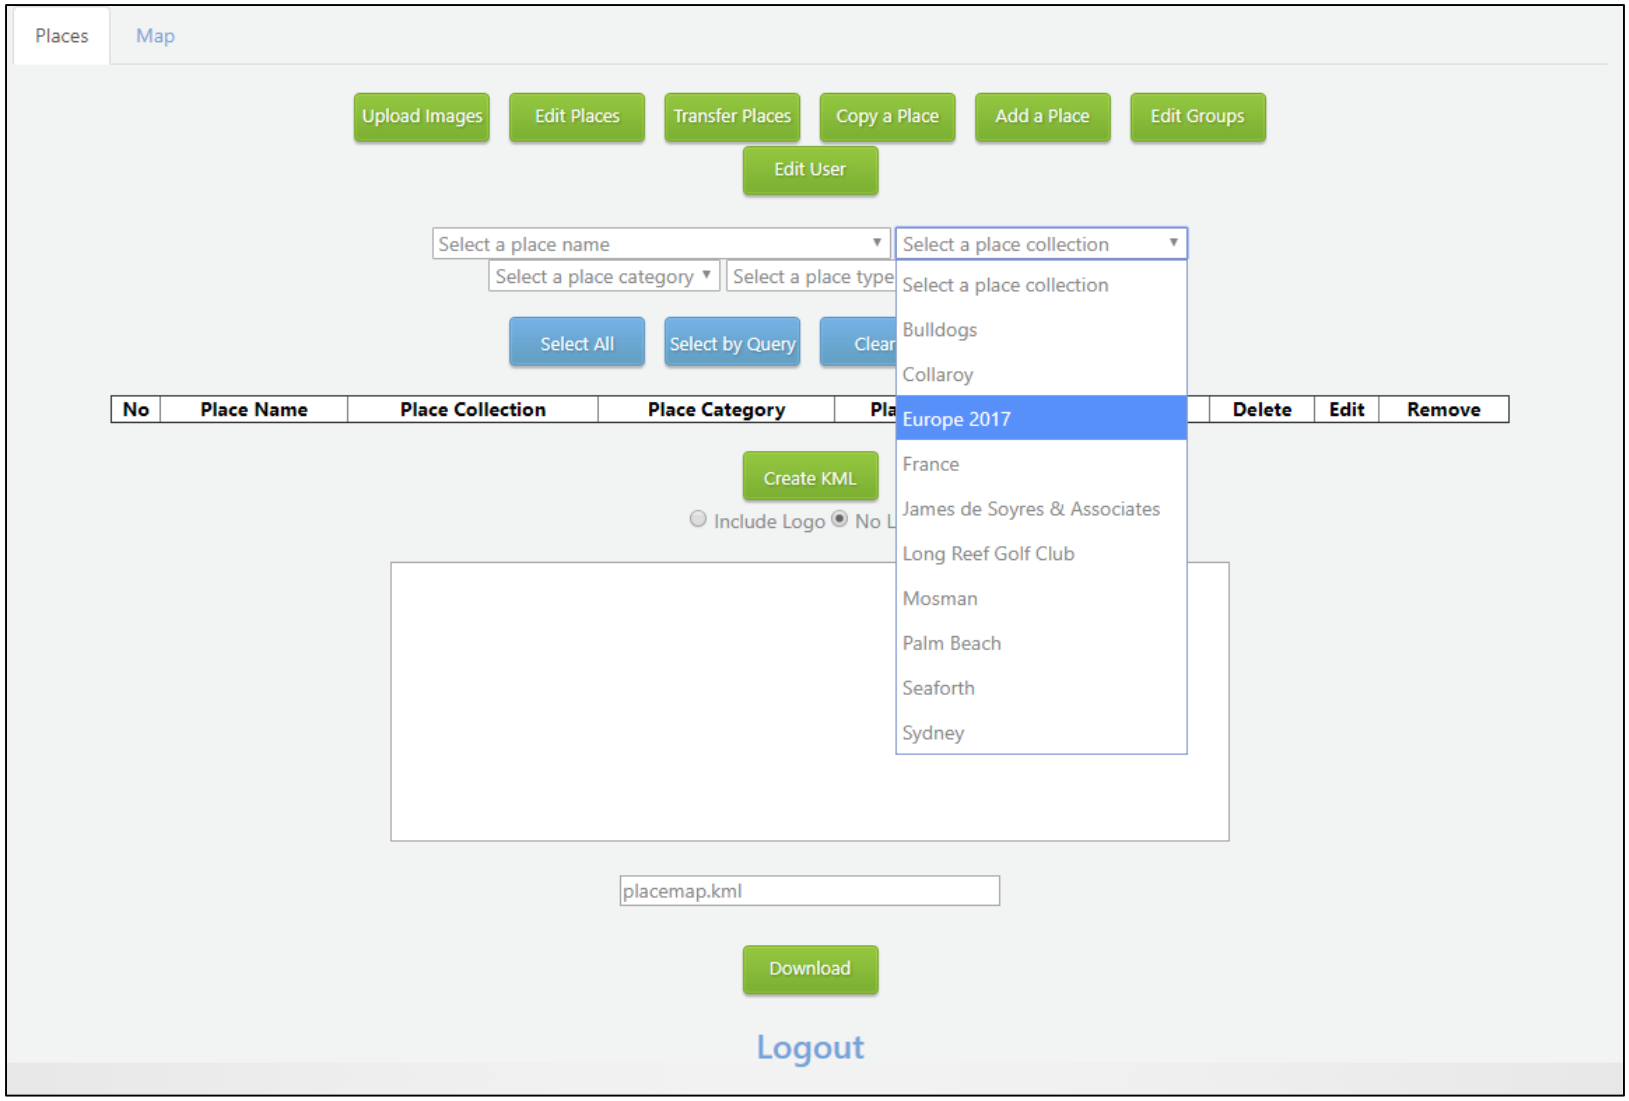
Google Earth is a free software program that lets you fly anywhere on Earth to view satellite imagery, maps, terrain and 3D buildings.

When used in conjunction with PlaceMap, it becomes a very powerful 3D tool that can be used for storing, querying, displaying, printing and distributing all of your spatial data.

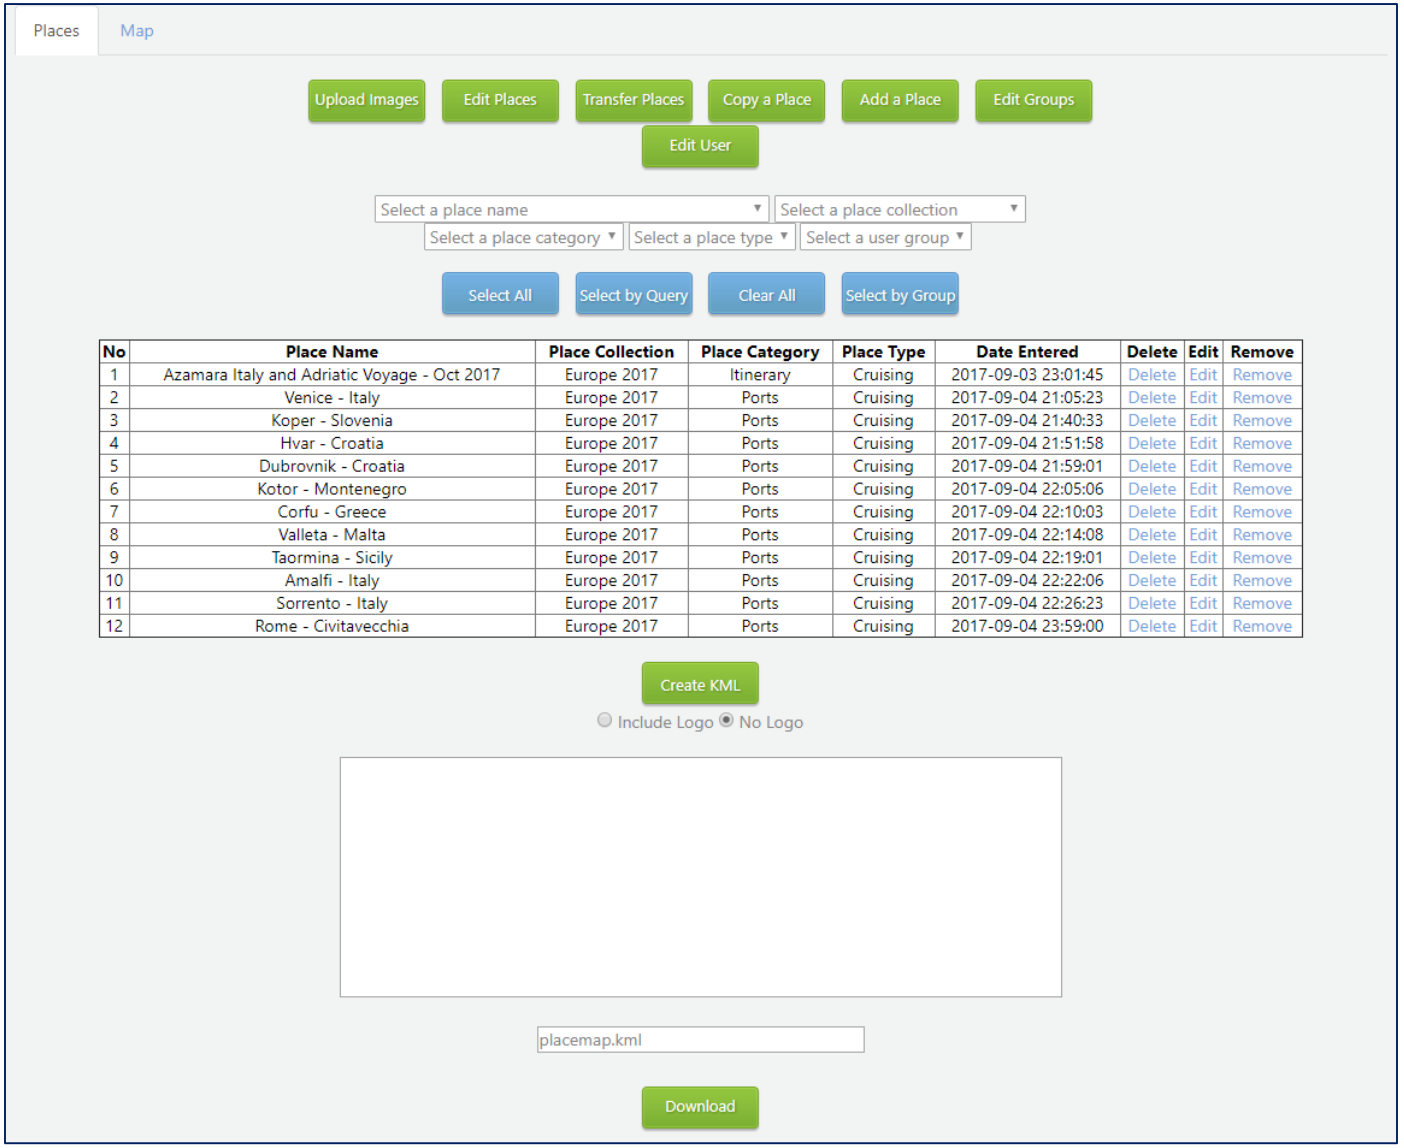
For other industries such as Tourism incorporating cruising, driving and hiking, PlaceMap again offers many advantages over the existing map display tools including:

- ✓ Use the power of Google Earth for "flying" over the terrain in 2D or 3D
- ✓ Overlay tracks on the 3D terrain surfaces and use the View Elevation Profile tool to view the track profile details such as distance, elevation, steepness etc.
- ✓ Create KML/KMZ files of multiple places and tracks which can be emailed to interested parties. KML/KMZ files can be opened directly from the email on computer and smart phones and will automatically zoom into the places of interest
- ✓ Use the tools available in Google Earth such as the distance measurement and digitizing tools
- ✓ Use the existing layers in Google Earth primary database for viewing location photos, tourist attractions, restaurants, bars, bus stops and much more
- ✓ Create and view walking, cycling, driving, cruising tracks and overlay image maps
- ✓ Link directly to the tourist agency website
- ✓ Save high quality images and movies for printing or emailing to clients
- ✓ Add your own place marks and paths to highlight interesting places
- ✓ Add photographs and place them in the correct position and view
- ✓ Store multiple property KML's on your smart phone for easy reference such as cruise itineraries
- ✓ Query places and tracks and then create custom KML/KMZ files

The main PlaceMap page allows you to query places and add them to build up a set of places that can be exported in a single KML/KMZ file



In this example, a cruise and port places are selected



No	Place Name	Place Collection	Place Category	Place Type	Date Entered	Delete	Edit	Remove
1	Azamara Italy and Adriatic Voyage - Oct 2017	Europe 2017	Itinerary	Cruising	2017-09-03 23:01:45	Delete	Edit	Remove
2	Venice - Italy	Europe 2017	Ports	Cruising	2017-09-04 21:05:23	Delete	Edit	Remove
3	Koper - Slovenia	Europe 2017	Ports	Cruising	2017-09-04 21:40:33	Delete	Edit	Remove
4	Hvar - Croatia	Europe 2017	Ports	Cruising	2017-09-04 21:51:58	Delete	Edit	Remove
5	Dubrovnik - Croatia	Europe 2017	Ports	Cruising	2017-09-04 21:59:01	Delete	Edit	Remove
6	Kotor - Montenegro	Europe 2017	Ports	Cruising	2017-09-04 22:05:06	Delete	Edit	Remove
7	Corfu - Greece	Europe 2017	Ports	Cruising	2017-09-04 22:10:03	Delete	Edit	Remove
8	Valleta - Malta	Europe 2017	Ports	Cruising	2017-09-04 22:14:08	Delete	Edit	Remove
9	Taormina - Sicily	Europe 2017	Ports	Cruising	2017-09-04 22:19:01	Delete	Edit	Remove
10	Amalfi - Italy	Europe 2017	Ports	Cruising	2017-09-04 22:22:06	Delete	Edit	Remove
11	Sorrento - Italy	Europe 2017	Ports	Cruising	2017-09-04 22:26:23	Delete	Edit	Remove
12	Rome - Civitavecchia	Europe 2017	Ports	Cruising	2017-09-04 23:59:00	Delete	Edit	Remove

On a computer, the kml file can be opened in Google Earth to display the cruise and selected ports

Click on the cruise icon to display the information about the cruise
